¹ The term “under” refers to a relationship between a student and a dissertation/thesis advisor.

² The phrase “studied under” means “strongly influenced by.” Those who “studied under” a professor were greatly influenced by that professor in person (i.e., not merely through reading the person’s works), but that professor did not serve as an advisor for a degree.

³ The phrase “end of line” indicates the earliest person in a particular academic line for whom I have information.
